Processor 115 CD

Description

The Processor 115 CD processes the paper roll on line. It punches formaline holes and is located between the Unwinder 52 CD and the printer in the LASERMAX system. The speed of the web is adapted to the printer. Maximum width of paper from roll is 520 mm (20.5").

Technical characteristics

- Microcomputer-controlled with diagnostic features
- Control panel with display
- Alarm and stop function in the case of paper web breaks
- Electronically-controlled motor via photocells ensures necessary web loop
- Integrated photocell loop ramp
- Hard metal tools consisting of punches and dies

Available for Océ model
